[AdEdge Water Technologies](http://www.adedgetechnologies.com)
www.adedgetechnologies.com

Integrated treatment solutions for Ion Exchange, oxidation, filtration, absorption, reverse osmosis, membrane systems, skid mount and modular systems. Contaminants treated: arsenic, iron & manganese, fluoride, uranium hydrogen sulfide, nitrates, radium, turbidity. NoMonia biological ammonia removal systems and biotita biological nitrate removal systems. WaterPOD ized systems are fully integrated, pre-wired, package systems that combine system performance with economy resulting in an ideal solution for sites where space, costs, and schedules are critical.

[Amwell](http://www.amwell.com)
A Division of McNish Corporation
www.amwell-inc.com

Clarifier drives, bridge supported worm gear, pier supported split spur gear, concentric (clarifier/flocculator drives) motor driven and non motor driven rotary distributors for trickling filters. Thickeners, flocculators, horizontal and vertical paddle type, grit removal systems, aerated and non-aerated. Extreme duty rectangular collectors and cross collectors with DuraMax cast stainless steel chain products. Scum skimmers, telescoping valves.

[ASI American Structures, Inc.](http://www.ameristruc.com)
www.ameristruc.com

Bolted Stainless Steel Tanks (expandable, recyclable, environmentally friendly) Roofs and Domes, offering design support, erection, welding, and a full service fabrication shop

[AWC Water Solutions](http://www.awcwater.com)
www.awcwater.com

AWC is an engineering manufacturer of "packaged" Water and Wastewater plants. Products range from conventional flocculators, clarifiers, and all types of filters. AWC specializes in fabricating and using marine grade aluminum, stainless steel, and epoxy coated steel. All plants are pre-wired, pre-plumbed, pre-assembled, and fully warranted.

[Atlantium Technologies](http://www.antlantium.com)
www.antlantium.com

Hydro-Optic Water Treatment. The only UV validated to US EPA 4-Log Virus Dose using Live Adenovirus with 3rd party validation. Extremely efficient and a bulb replacement takes only 4 minutes. Remote monitoring capability and automatic reporting for regulatory compliance.

[CBI Water and Waste Water Systems](http://www.mcdermott.com)
www.mcdermott.com

Headtank aerators, natural draft and forced draft. Claricone clarifiers provide solids contact clarification for lime softening, turbidity and color removal, iron removal, arsenic removal, radium removal, and phosphorus removal. Helicarb for CO₂ ph adjustment. Decelerating Flow Filters for efficient filtration and backwash water savings. FiltraCone modular water treatment plants. Egg shaped digesters.

[Calgon Carbon](http://www.calgoncarbon.com)
www.calgoncarbon.com

Granular activated carbon filter media for reduction of organics, THM, HAAs, taste and odor, and other and contaminants. Calgon offers Turnkey GAC removal and replacement of the media. Reactivation services are available for reactivating the carbon once the adsorptive capacity has been depleted thus reducing costs of media replacement.

De Nora
www.denora.com

Since the 1960's, De Nora has been providing filtration process expertise and global innovation. Their technologies including De Nora TETRA, DEEPBED filters, Denite denitrification systems, bioreactors, and filter under-drains for water and wastewater treatment. With a strong trusted brand and reliable aftermarket support packages, you can trust 55 years of filtration.

Glass-Steel Inc.
www.glassteelinc.com

Composite troughs utilizing a fiberglass skin on the inner and outer surfaces with a polymer concrete core. Troughs, baffle walls, Stamford baffles, walkable launder covers, weir plates, stop logs, gates and plates, scum baffles and brackets, walkway and handrail systems, and Parshall flumes.

Five Star filtration LLC
www.5starfiltration.com

Continuous upflow sand filtration for water and Waste Water. Fixed disc filter with rotating backwash assembly for continuous filtration. Ability to ISOLATE each disk independently for continuous filtration. Innovative continuous filtration systems for water and wastewater, Municipal and Industrial applications.

Mooers Products
www.mooersproductsinc.com

Complete Aeration Systems enhanced oxygen transfer, reduced maintenance costs Flexcap coarse bubble diffusers known to last over 20 years. Side Car aeration for RBC facilities, blowers, custom design, and retrofit aeration systems. Providing proven and reliable systems and complete owner support.

Orthos Liquid Systems
www.orthosnozzles.com

Filter nozzles, strainers, monolithic underdrain systems and accessories for all of your filter needs. Orthos Liquid Systems offers a full range of filter nozzles, strainers, and accessories that can accommodate any filter nozzle underdrain design. Whether it is for a false plate filter bottom, header/lateral or monolithic filter underdrain system, Orthos Liquid Systems has a solution for any and all your filter needs.

Parker Hannifin Corporation
www.parker.com

The Parker THM Analyzer is an easy to operate, integrated Purge-and-Trap Gas Chromatograph that measures THM concentration at ppb levels in less than 30 minutes right at your own facility without tedious sample preparation. A THM analysis can be ran onsite on any sample gathered at the treatment plant or from anywhere in your distribution system.

TOMCO₂
www.tomcoequipment.com

Eco-friendly solutions for your ph control. Precise ph control. CO₂ storage tanks and vaporizers. Basin injection and pipeline injection systems. Pressurized Solution Feed Systems "PSF" for maximizing the solubility of CO₂ gas and converting it to carbonic acid.

Aquaflo Technologies Inc.

Serving the Water and Waste Water Industry with honesty, integrity, and credibility.
